

Gina Citoli - "The Musical Medicine Woman" *Empowerment and Transcendence*

Metaphysical Musicals that are Musical Medicine for Your Soul.

Definitions of Words and Concepts in Gina's Metaphysical Musicals.

Metaphysics: A gateway into the exploration of life that exists beyond what we have known. Metaphysics is an inquiry into the expression of existence. It seeks to answer questions about being, self-awareness, self-healing, free will and connection with higher states of consciousness. It embraces the discovery of who we really are, what it means to be human, and the overall nature of reality

Superluminal: (Superb, Enhanced, Brilliant, Shining, Radiant, faster-than-light.

Critical Enlightenment: Decisive, vital, and essential wisdom coalesced with insights and instinct to advance and expand human consciousness. Ultimately leading each human being to a direct and unbreachable connection to cosmic wisdom, their own divinity, intrinsic powers, and the knowing that we are all Divine Humans and magnificent creator beings. (God Source

Divinity: The Ability to Transcend ALL Limitations

Reality Field: This is a new term coined by Dave Emery. It came as a way to step out of timelines as the usage of timelines keeps us trapped into the notion of time which only truly exists within the matrix as another form of control.

Exquisite Imagination: This is my thought process as I feel we need to ignite a more elevated way to craft our lives and the cosmos with our imagination beyond the mundane and mediocre and come from the place of exquisite superluminal consciousness.

Exquisite: Highly skilled, intricate, esoteric art; excellently made or formed. Flawless craftsmanship beautifully and ingeniously performed.

Alchemy: Alchemy is the art and science of illumination and inner liberation. It is the ability to change the frequency of thought, alter the harmonics of matter and apply the elements of love to achieve transformation. Alchemy is the breaking down of the old and synthesizing it into a new form.

Universal Law: Universal Law states that we possess the power to change the conditions of our lives. High vibration and frequency consumes and transforms lower ones. We are able to change the energies in our lives by comprehending the Universal and Natural Laws. Universal Law is the geometry of how the universe works. Examples are the law of correspondence, the law of one, and the law of vibration - as above so below, as within so without.

The 12 universal laws are thought to be intrinsic, unchanging laws of our universe that ancient cultures have always intuitively known.

Natural Law: The laws of Nature (Life), the Land, Spirit and Prime Creator. It is our natural rights to freedom, clean air and water, healthy food and a peaceful world of abundance, prosperity and love!
